Jeff Gamelli, Westfield WWTF - Overview of the Westfield MA WWTF

Chris Caron, American Safety - Gas Meter Bump Test vs Calibration—What You Need to Know - A bump test is a brief exposure of the monitor to gas in order to verify that the sensors respond and the instrument alarms function accordingly. The bump test does not check the accuracy of the instrument. This is where the calibration check comes in.

Eric Smith, WhiteWater - Lone Worker Safety Devices - SoloProtect specializes in lone worker safety, with their discreet and easy to wear safety device that comes equipped with a GPS, incapacitation alarm, red alert, and 24/7/365 Monitoring Centers. They provide a safeguard for lone workers who potentially face social and environmental risk every day.

Jacob Weinrich, - Tighe & Bond; Mike Williams, SUEZ - Upgrades to Two 75 ft Squirrel Secondary Clarifiers in Chicopee, MA - The Chicopee WPCF recently upgraded two of four 75' square secondary clarifiers, which included installation of energy dissipating inlet wells and baffling to improve clarifier hydraulics. A side-by-side evaluation of the original and upgraded secondary clarifiers was completed to determine performance improvements.

Alan Stratton, - Tighe & Bond - OSHA Top Ten Violations and How They May Impact Your Wastewater Treatment Facility - Each year the Occupational Safety and Health Administration (OSHA) releases its Top Ten Most Frequently Cited Violations. By familiarizing themselves with these most cited violations, Treatment Plant operators can minimize the potential for injuries, near misses, and potentially catastrophic incidents. With an increased focus on OSHA compliance within the state, it is even more important to hear real life examples of the most cited violations from experienced safety professionals who work within the industry!
